WWW: LinkedIn | Portfolio

A software developer with seven years of experience specializing in Agile software development, back-end development, Python, and web development. A strong history of developing innovative application features and software solutions to enhance the UX.

Key Skills

- Java, Python, and C++
- UI design
- Quality assurance testing
- MySQL
- Software development

Professional Experience

Software Developer

Lore Gaming, San Diego, CA | November 2019 - Current

- Develop system architecture to streamline bandwidth and reduce downtime and lag for outside users by up to 20% in coordination with a team of over 10 software developers
- Collaborate with gaming designers to create interactive solutions and drive user engagement, including the integration of a new matchmaking feature to improve the multiplayer experience
- Supported the integration of an Agile-Waterfall hybrid methodology to improve the SDLC, resulting in a 15% reduction in project delivery timelines

Software Developer

Ark Tech Solutions Inc., San Diego, CA | June 2016 - Current

- Partnered with a team of application developers and software engineers to design a mobile application in Python for recruiters and jobseekers, which resulted in over 3 million downloads to date
- Increased user engagement and satisfaction by 30% by developing new application features to improve access management and app functionality

Education

Bachelor of Science (B.S.) Software Engineering June 2016
University of San Diego, San Diego, CA

Certifications

- Certified Software Development Professional (CSDP), IEEE, 2018
